

# Switchcraft® PRODUCT UPDATE

# #3

## Color coded RCA feed-through inserts for EH Series panel-mount connectors...

The EH Series by Switchcraft® is a complete line of audio, video, and data connectors built into standard XLR housings. Custom combinations of EH Series connectors can be easily loaded into a QG Series panel.

Our EH Series RCA feed-through connector comes standard with a black insert, but can also be ordered in a variety of colors.

These inserts can be used on their own as RCA barrel adapters or panel mounts, or ordered with an EH Series housing kit for loading into a QG Series panel.

### Ordering Information:

1. Order Empty Housing Kit...
  - EH1PKG (Nickel)
  - EHB1PKG (Black)
2. Choose the color of your insert...
  - BPJJ01 (Black)
  - BPJJ02 (Red)
  - BPJJ03 (White)
  - BPJJ04 (Yellow)
  - BPJJ05 (Blue)
  - BPJJ06 (Green)
  - BPJJ07 (Orange)
3. Assemble connector and load into QG Panel (QGPK1B440 or QGPK3B440, for example)

-BPJJ02 (Red)

-EHB1PKG assembled with BPJJ01 (Black) Insert.

## 1/4" plugs that accommodate larger cable diameters...

280

Some variations of the standard 226 and 280 to keep in mind...

**280L** - 280 with a larger (.323") inside diameter

**285L** - 280 with a larger (.375") inside diameter

**226L** - 226 (right angle) with a larger (.323") inside diameter

**2P1603** - 280 with a larger strain relief

Everyone is familiar with our standard 226 and 280 1/4" plugs, but not everyone is aware that we have many variations of them available to suit more specific needs. With trends in cabling moving toward larger cable diameter, we thought you should be aware of some of the more popular variations of the Switchcraft® 226 and 280.

In most scenarios, the 280 (straight) and 226 (right angle) with inside diameters of .297" are suitable, however, you may find that you need either a larger inside diameter or a larger strain relief to accommodate your particular cabling situation. If that's the case, a few of the more popular options of the 280 and 226 are the 280L with an inside diameter of .323", the 285L with an inside diameter of .375", the 2P1603 with a larger strain relief, and the 226L, a right angle version with an inside diameter of .323".

For those of you attending the upcoming 2008 NAB Show in Las Vegas, please stop by booth # C7508 for all the latest.
